HOME and AWAY mode

A locked door can always be opened from the inside button.

STATUS OF THE DOORS

OPEN MODE Lock is open and the door won't get locked after closing.

LOCKED MODE The door is locked. It can be opened briefly from inside. When you use a locked door the lock controller informs you if the door is left open for a longer time.

CENTRAL OPENING MODE All the doors are locked. It can be opened briefly from inside. When you use a locked door the lock controller informs you if the door is left open for a longer time.

HOME MODE All the doors are locked and door surveillance is activated. Any unauthorised use of a door or door left open will trigger an alarm on all doors in the system.

AWAY MODE All the doors are locked and the home is left empty. The "away" functions of the intruder alarm and home automation system connected to the system are activated.

FEATURES THAT MAKE ABLOY® CONTROL+ EASY TO USE

- Same remote key can be activated to home, garage, office etc. - up to 50 different doors.
- Lock controller informs you with it's display and tone about door or system status and alerts.
- Up to 16 doors per system.
- Can be connected to intruder alarm or home automatisasion system.
- When you lose your key or you want to get a new remote key in use it's very easy to program it by yourself.
- Power failure doesn't affect on the lock controller operated doors.
- A battery life time in remote key and lock controller is approximately two years. Batteries are very easy to change.
- You only need to have one mechanical lock in one door.

single-family homes, small offices

Home or garage doors open near or far by simply pressing the remote key button. Closing all the doors at once is just as easy.

When going to sleep for example you can secure your home with the HOME mode. After that any unauthorised use of a door triggers an alarm
