ABLOY® KEYAXXESS

Completing your key management system

Redefining key management efficiency

ABLOY® KEYAXXESS is an integrated key control and task management solution. While it provides industry-leading safe storage cabinet for your crucial keys, it also manages them efficiently. Every key can be assigned to specific users that are able to use them within predefined time frames. Removing and returning keys take place over personal identification, so no supervision is required. Every removal and return is also recorded so that complete audit trail is always available.

Complete security

In **ABLOY®** KEYAXXESS the real key recognition is based on the validation of the mechanical key to be managed and monitored. Compared to most key cabinets that only validate RFID identification tag in the key ring, this provides an additional security factor to the entire system. The same goes for other cam lock based solutions that use the key as an anchor to hold controlled keys.

Advanced features

User groups

Reporting

Key management

Alerts and alarms

Task management

Convenient key issuing

Real key security

Audit trail

Higher security for a wide variety of purposes

ABLOY® KEYAXXESS offers exceptional opportunities for monitoring a locked area through task management, so that only people that are cleared for performing certain duties (such as cleaning, maintenance and security) are allowed to enter the area. **ABLOY®** KEYAXXESS efficiently meets the requirements for high security, more convenient handling and efficient key administration.
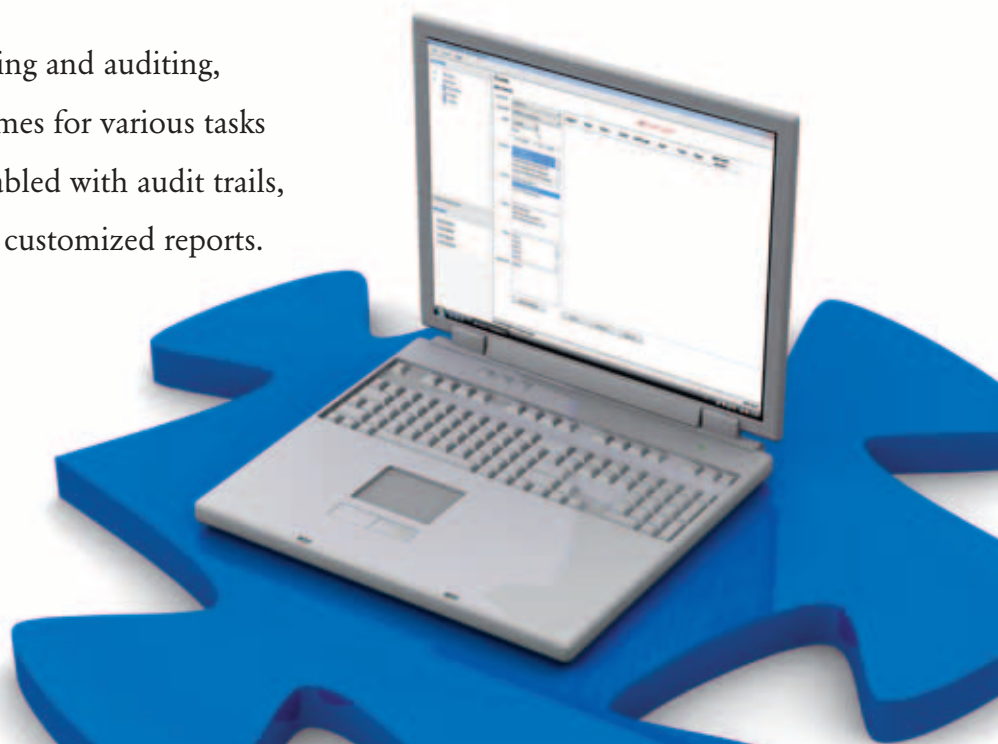

Professional end-users can include banks, hospitals, police, teleoperators, energy companies and military, as well as various educational and research facilities.

Managing your keys with **ABLOY®** KEYAXXESS

ABLOY® KEYAXXESS efficiently completes your key management system. Its operations are based on individually coded electromechanical key holders. These holders secure your keys inside the high security cabinet.

Key security includes issuing and auditing, alerts and setting time frames for various tasks Advanced reporting is enabled with audit trails, safe status and generating customized reports.

Sophisticated technology for best results

Cabinet

- Pulver coated steel cabinet
- See-through door
- Dimensions: H 615 mm, W 505 mm, D 180 mm
- Weight 40 kg
- Battery back-up

Identification

- RFID
- PIN code
- User number
