

Material and Resources      Credit 2.1 Construction Waste Management      1 point

All zinc construction wastes can be separated easily from other metals and sent to any local scrap metal dealer. Zinc in the United States can be reused by the galvanization industry.

Material and Resources      Credit 4.1 Recycled Content      1 point

*Post-consumer content = 17%*

*Pre-consumer (Post-industrial) = 0%*

Post-consumer content: all VM ZINC® products come from one smelting plant located in Auby, France.

The plant uses 17% recycled zinc to produce all VM ZINC® products.

Indoor Env Qlty      Credit 4.2 Low Emitting Matls      1 point

Umicore does not apply any coating on standard VM QUARTZ ZINC® material. Consequently, no VOCs are generated.
